

## Soft Touch Placement Review

By Bhavin Gohil

Soft Touch Leicester, gave me the chance to complete ten five hour sections, to learn about a range of applications which included Flash, In design, Windows Premier, Photoshop and much much more!

This opportunity was kindly given to me because myself and my tutor, Nick Ward thought it would help me and give me that extra knowledge needed to get on my level three IT course for college in September. I enjoyed working with Nick because he focused on the areas that were of interest to me.

Nick also enhanced my knowledge a great deal in explaining some of the technical terms e.g. open source software and Word Press.

I would like to take this opportunity to thank Soft Touch and Nick Ward for there kind support and in-depth knowledge of IT. I look forward to working with Soft Touch again if other opportunities became available.

I designed this in Flash and it was used on the home page and accreditation page on the Soft Touch website.
